NATHANIEL (NATE) POWELL

FINANCE / RISK / DATA

n2powell@uwaterloo.ca | github.com/Tophacks | quadmates.ca
University of Waterloo | Co-operative undergraduate studies | 2025-present

PROFILE

Analytical product founder with experience organizing financial data, prototyping Python automation, and negotiating engineering sponsorship support. Incoming Infosys InStep intern focused on AI agent engineering.

EXPERIENCE

UW Orbital | Business and Finance Team

2026-present

- Organized engineering expense records in Excel to support budgeting and financial visibility.
- Prototyped Python workflows to reduce repetitive financial-data processing and manual updates.
- Negotiated corporate manufacturing support while accommodating sponsor production schedules and maintaining long-term partnerships.

Quadmates | Founder and Product Developer

2026-present

- Built and launched a student-focused matching platform; managed product priorities, user feedback, and implementation decisions.
- Worked with SQL-backed product data, authentication flows, and iterative user testing.

INFOSYS INSTEP | Incoming Computer Engineering Intern - AI Agent Engineering

Jan-Apr 2027 | Bengaluru, India

- Selected for an upcoming internship with the Infosys CTO office, focused on AI agent engineering and enterprise workflows.
- Planned internship scope includes AI-assisted business-process automation; project deliverables will be updated after the role begins.

SELECTED PROJECTS

Selected technical projects

TransitOps: Python transit simulation; NeuroSim: reinforcement-learning control experiments.

TECHNICAL AND PROFESSIONAL SKILLS

Excel, PowerPoint, budget tracking, financial-data organization, Python, SQL, stakeholder communications, business analysis

Infosys is an incoming position; no internship deliverables are claimed as completed.
